

SUMMER SCHOOLS

at The British School of Lomé

EVERYONE WELCOME

More detailed information on our different Summer Schools

ARTIFICIAL INTELLIGENCE WORKSHOPS (SCHOLARS)

All students must bring
tablet/laptop.
Other materials included.

AI Scholars Programme (InspiritAI)

13th-24th July

8:30-12:30

Age 15-18 yrs

2 weeks
half day

For those who are aged 15-18 yrs with an interest in AI and technology.

Curious how self-driving cars, facial recognition, and voice assistants actually work? In the Inspirit AI Scholars Program, you'll learn the foundations of artificial intelligence and machine learning – and apply them through hands-on Python coding.

Train models to predict outcomes, classify real medical data, explore neural networks, and dive into computer vision and natural language processing. Then, complete a collaborative AI project in a field you care about – from healthcare to finance to space science.

With expert mentors, interactive workshops, and a final showcase project, this programme gives you the skills, confidence, and insight to stand out in a world powered by AI.

PRICES

900 \$US pour 2 semaines

Pay in full before summer commences or pay weekly.
