INSPIRIT AI

ARTIFICIAL INTELLIGENCE WORKSHOPS (PIONEERS)

**All students must bring tablet/laptop.
Other materials included.**

AI Pioneers Programme (InspiritAI)	13th-24th July	8:30-12:30	Age 10-14 yrs	2 weeks half day

For those who are aged 10-14 yrs with no coding experience.

In AI Pioneers, you'll learn how to code in Python and build real-world projects that tackle big challenges — from predicting heart disease and analysing disaster tweets to creating movie recommendation systems and exploring self-driving cars.

PRICES   **$900USD for 2 weeks**

Pay in full before summer commences or pay weekly.

Through hands-on coding labs, interactive machine learning sessions, and an exciting final capstone project, you'll discover how computers can learn from data using tools like natural language processing and computer vision. You'll even build your own chatbot and train AI models just like real engineers.

Led by mentors from top universities, this course is designed for beginners and experienced coders alike. Along the way, you'll explore ethical AI, future career pathways, and how technology can be used for social good.
